# RCG

# RESILIENCE CYBER GROUP (RCG)

Secure Cyber Infrastructure for Mission-Critical Defense Environments

## OVERVIEW

Resilience Cyber Group (RCG) is a Huntsville-based defense cyber integrator delivering secure systems architecture, RMF authorization engineering, and operational hardening for mission-aligned environments aligned to NIST frameworks and RMF processes.

## CORE CAPABILITIES

- Secure Systems Architecture – Enclave design, boundary definition, segmentation modeling
- RMF & Authorization Engineering – SSP development, POA&M; execution, ATO preparation
- Mission Hardening – NIST 800-53/171 alignment, CMMC implementation engineering
- Operational Cyber Readiness – Evidence tracking, governance architecture, control validation

## SELECT PERFORMANCE METRICS

- Led and supported 200+ Navy IT projects across secure defense environments
- Reduced system authorization preparation timelines by up to 30% through documentation engineering discipline
- Improved control validation accuracy and audit readiness posture across multiple defense-aligned systems
- Accelerated POA&M; remediation tracking cycles through structured evidence workflow design

## DIFFERENTIATORS

- Huntsville defense ecosystem alignment
- Founder-level defense program leadership experience
- Structured internal cyber associate development track
- Agile support model aligned to prime contractor workflows
- SDVOSB certified | 8(a) pipeline positioning
